3000 Series Fixed Window Features & Benefits

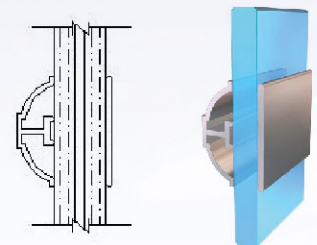

- Small and Large Missile Impact Fixed Window for use in Residential and Commercial Applications.
- Tested and approved in accordance with Metro Dade and Florida Building Code testing protocols FBC TAS 201, 202 and 203.
- Heavy duty 3 1/8" deep aluminum frame assembled at each corner with three stainless steel fasteners.
- Architectural shapes available. Consult your local dealer for options.
- Stock colors are available in White or Bronze Powder Coat. Custom colors and finishes are available on unit-by-unit order.
- Stainless steel hardware fasteners standard.
- Exterior tear away flange.
- Interior factory punched installation holes eliminate possibility of water leakage at anchors. Decorative glazing bead hides all of the installation holes for a clean finish.
- Laminated glass provides superior UV protection and sound resistance in comparison to standard monolithic glass.
- Glass color clear. Custom colors available upon request.
- Tested to 6.24 psf of Air Infiltration.
- Tested to 13.5 psf of Water Resistance.
- Wall thicknesses vary from 0.062" thru 0.093".
- Colonial grid options include: flat over flat, decorative raised over flat or decorative raised over decorative raised.
- Unlike tape glaze systems, Global Impact Product systems offers superior adhesion performance and are structurally glazed with structural silicone.
