4000 Series Casement Window Features & Benefits

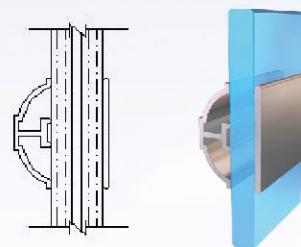

- Large and Small Missile Impact Casement Window for use in Residential, and some Commercial Applications.
- Tested and approved in accordance with Metro Dade and Florida Building Code testing protocols FBC TAS 201, 202 and 203.
- Heavy duty 2 1/2" deep aluminum structural frame.
- Vent and frame have mitered corners with internal gussets for alignment and additional strength. Both vent and frame are assembled with two stainless steel fasteners at each joint.
- Hinge options include heavy duty commercial grade loose rivet dual stainless steel 90 degree and washability hinges.
- Operator options include straight arm and dual arm operators for smooth travel.
- Concealed multipoint locking system operated by a single decorative interior handle.
- Stock colors available in White or Bronze Powder. Custom colors available.
- Stainless steel fasteners on all hardware standard.
- Installation of anchors not required at heads or sill reducing possibility of water intrusion. Factory punched installation holes in jambs.
- Glass options clear. Custom colors available upon request.
- Tested in laboratory to 6.24 pounds of air infiltration.
- Tested in laboratory to 13.5 pounds of water resistance.
- Unlike tape glaze systems, Global Impact Product systems offers superior adhesion performance and are structurally glazed with structural silicone.
- Vent sides weather-stripped with two rows of high performance wool pile with an integral 0.170" high finish seal to provide high performance air and water intrusion resistance.
- Foam filled bulb vinyl at sill and vent bottom rail connection provide uniform water barrier.
